Transhuman Coin

Investing In The Future Of Humanity

DeSci Whitepaper V4.0

https://www.transhumancoin.finance

$THC EXPLAINED

Transhuman Coin ($THC) is a 3+ year impact-driven DeSci project committed to advancing human longevity, health, and well-being through cutting-edge science and technology.

Powered by a dynamic Scientific Advisory Board featuring visionaries such as Prof. Aubrey De Grey (Father of Longevity Science), Prof. Avinash Singh (a Brain Computer Interface Expert), Dr. Charles Awuzie (a biochemist), Peter Xing (AI innovation leader at Microsoft Australia), and Alyse Sue (former Director of Metaverse, KPMG Australia), among others, Transhuman Coin drives innovation in decentralized science.

Our flagship initiative, the THC-Powered Telemedicine Network, connects underserved communities with affordable and AI-driven telemedicine services, revolutionizing access to healthcare. With payments facilitated through $THC tokens, this project empowers individuals while driving token adoption.

Over the past three years, Transhuman Coin has funded transformative longevity research in Australia and Africa, addressing critical challenges in the fight against aging and disease. Our investments include supporting the FoxG1 Foundation Australia, advancing genetic solutions for neurological conditions, and funding groundbreaking innovations like Abby-Wheelchairs, a project developing autonomous wheelchairs for enhanced mobility.

Transhuman Coin is the largest community-driven cryptocurrency project dedicated to Transhumanism.

Transhumanism is the ideology of enhancing human life through Science and Technology.

THE PROBLEM WE ARE SOLVING

Transhuman Coin is a BEP20 token dedicated to solving difficult human problems using technologies by funding Reseach and Development of Technologies that augment or increase human sensory reception, emotive ability, cognitive capacity, reverse ageing as well as radically improve human health and extend human life spans.

In 3 years after launching, we have successfully funded projects funded like the FOXG1 Foundation, Abby Autonomous Wheelchairs and multiple Science Events across the world including Hackathons at the University of Technology, Sydney, Australia, Transvision Madrid, Spain 2022 on Longevity and Cryonics, International Longevity Summit, South Africa hosted by TAFFD and the Evolve Conferences in Lagos and Abuja, Nigeria. We have funded research through multiple universities in Africa and Australia including Abia State University, Uturu, Nigeria and University of Technology, Sydney.

Transhuman Coin is a blockchain based project that invests in Future Human Technologies. We are futuristic. We are a community of Futurists inspired by concepts like Singularity and Transhumanism. We research, develop, invest and own Intellectual Properties in fields like Artificial Intelligence, Robotics, Virtual and Augmented Reality including the Metaverse, Brain Computer Interface Technologies and Sci-fi movies.

Distinguishing Features

Web3 Clinic

Medical E-store

Scientific Advisory Board

VISION STATEMENT

We aim to build a decentralized Research and Development community with the capacity to fund research aimed at solving genetic & cognitive problems. We exist to solve real world problems by bridging the gap between funds and talents in the web3 community and the traditional scientific commmunity. We are the bridge between the traditional Science community and the Decentralised Economy.

VISION

Core Values of Transhuman Coin

Community

Community is the number one value of the Transhuman ecosystem. In the beginning, we asked if a project could succeed on the back of a decentralized, community effort. $THC prevailed due to the strength of its community members and investors. Our collaborative, Like-minded community is our bedrock.

Utility

We believe utility is the foundation of value in the crypto space. THC was founded on the principle that the crypto space is greatly lacking in Scientific application and utility. We believe utility will foster adoption and growth in the crypto space, and Transhuman Coin is taking Utility to the next level via our medical E-store which where users can buy Personal Medical Supplies using $THC and our Web3 Clinic.

Inclusivity

Transhuman Coin provides everyone equal access to opportunities and resources. Our community is popuated by people from every race and tribe.
We are one of the few crypto projects whose management team is made up of people of all races and gender. This is because we believe that all humans are equal despite race or gender.

Interconnectivity

Simply put, all parts of a system interact with and rely on one another. THC believes in creating an interconnected system based on trust and reliability, that together is greater than its individual parts. We demonstrate this through our partnerships in the Science, Technology, Longevity and Blockchain Ecosystems.

TOKEN DETAILS

NAME

Transhuman Coin

Symbol
THC

TYPE
BEP-20

Blockchain

Binance Smart Chain

Total Supply

7,000,000,000 THC

LIQUIDITY HARDCODED INTO THE SMART CONTRACT WITH NO WITHDRAWAL FUNCTIONS

AUTOMATIC LIQUIDITY

Automatic tax on each transaction 0.5% added to LP.

Marketing Wallet

0.5% of the tax will be distributed to marketing purpose

TOKENOMICS

We collect a total of 3% Tax on every Transaction.
To ensure the viability of the project long term a small portion of each transaction goes into the longevity and stability of the project:
0.5% will automatically go into the locked liquidity pool
1% will be automatically redistributed to incentivize holders.

Liquidity and Security

To ensure liquidity and security to the community the liquidity was hardcoded into the Smart Contract with no withdrawal function. 0.5% of every transaction goes to liquidity pool .

Transhuman Coin Funds

Our funding system is a groundbreaking new system designed to revolutionize project funding. We are revolutionizing the way Transhumanist Causes are funded.

Our vision is to use the $THC funding vehicle to provide an ongoing financing for Transhumanist projects deemed appropriate for support by our community in exchange for equity or Intellectual Property. We are striving to combat diseases and aging. Our community decides who and what we invest in - voting on a decentralized platform using their $THC. Those with more $THC have more voting power.

By using the blockchain system to vote for Transhumanist and Longevity Causes, our system provides complete transparency towards our funding and donations and reflects shareholders' voices. All fundings are made in $THC and beneficiaries are advised to hold the $THC on their balance sheet for a minimum period of 12 months.

People Buy THC

Members will be informed with Ongoing Research Projects and members vote will decide which Science oriented organization will get funding.

A block is then added to the chain providing a transparent record of the transaction

Transactions to organisations are fully auditable.

THC is transfered from the Scientific Advisory Board Controlled Fund Wallet to Beneficiary's wallet.

Partner Organizations

OUR PARTNERS WHO HAVE RECEIVED FUNDING FROM THC

THC E-Commerce Store

We have developed a medical E-commerce Store which sells custom made personal Health devices and Life Extension Supplements.
The good news is that our users can pay for the products with Transhuman Coin.
We are also going to include the ability to book medical appointment using THC in partnership with selected Medical Specialists in different countries.
Below are some of our products:

THC WEB3 CLINIC

The THC-Powered Telemedicine Network is a revolutionary healthcare platform enabling affordable, AI-driven medical consultations and diagnostics, powered by Transhuman Coin ($THC). This network connects underserved communities, particularly in Africa, to top-tier healthcare providers through a decentralized ecosystem. Patients can book consultations, access health monitoring tools, and receive diagnostic services, all paid seamlessly using $THC tokens. By combining blockchain technology with telemedicine, this initiative improves healthcare accessibility, promotes token adoption, and drives impactful change in global health.

Blockchain–Powered Accessibility

Not everyone can get worldclass medical care, but with blockchain enabled Medical Care Platform, we eliminate reliance on traditional financial systems to fund medical care, reducing transaction fees and making healthcare accessible to underserved populations, particularly in regions with limited banking infrastructure like Africa.

AI–Powered Diagnostics and Care

The network incorporates AI to enhance diagnostics and personalize treatment recommendations. Advanced algorithms analyze patient data, improving accuracy and speed in diagnosing health issues.

Enhanced Revenue and Global Reach for Practitioners

Medical practitioners benefit from direct access to a global patient base, removing geographical barriers. The decentralized payment model using $THC tokens ensures prompt, secure, and low-cost payments, increasing earnings by bypassing intermediaries.

THC Lending/ Borrowing

The architecture of lending and borrowing is about to be significantly disrupted by THC. We don't need banks or other intermediaries to complete a loan transaction as we decentralize lending. Decentralization also implies that once a Smart Contract is launched, borrowers and lenders trust it. These lending protocols offer a risk-free and transparent lending environment that is currently unavailable in the FIAT lending industry. No one can interfere with, interrupt, or alter the loan after it has been deployed, which is referred to as "trustless."
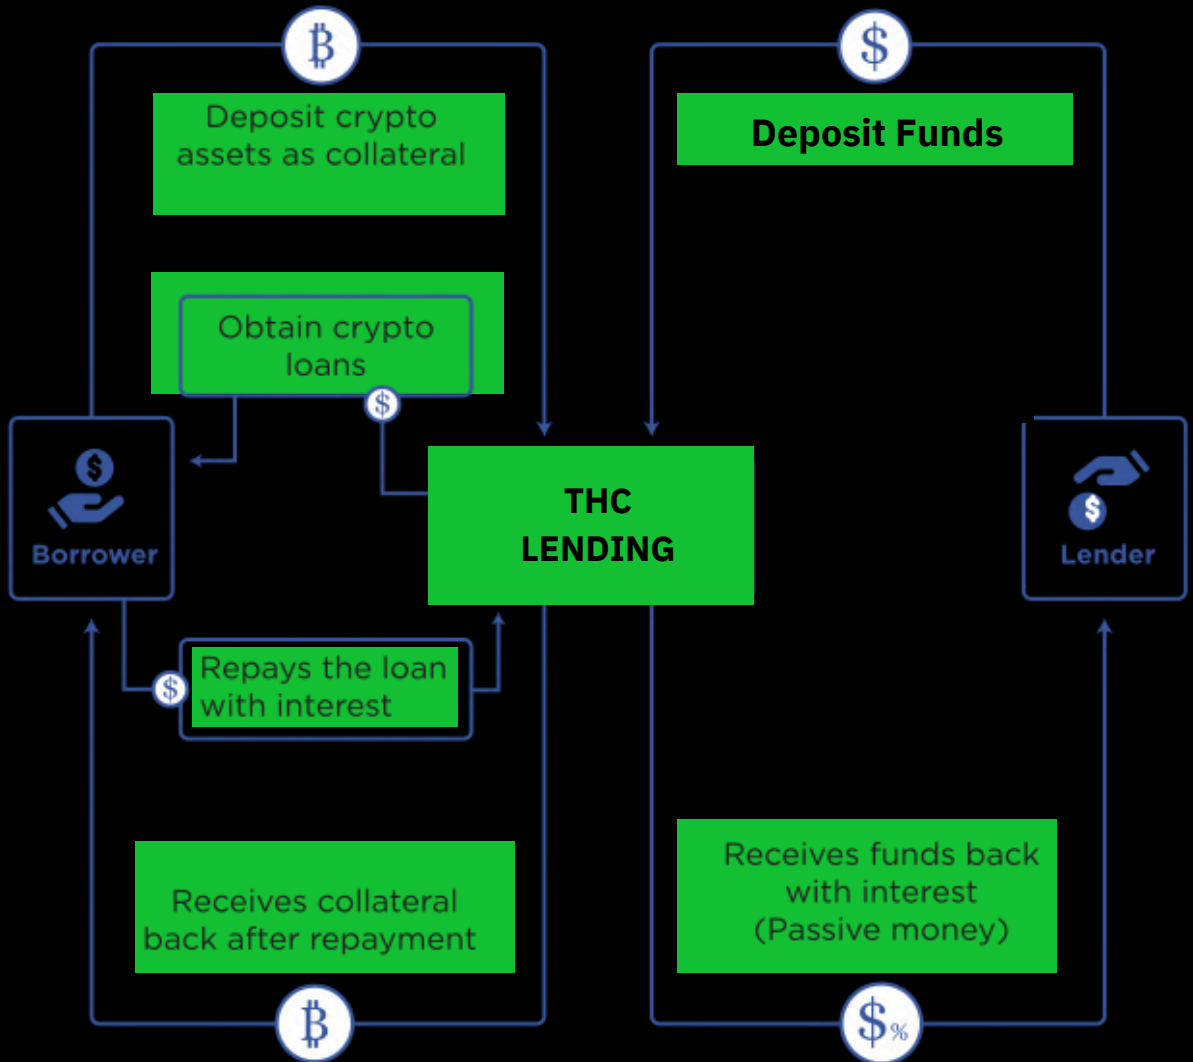

Through our partners, THC holders will lend and borrow Stablecoins using their THC as collateral. Lenders profit from interest, while borrowers can obtain loans fast and discreetly without having to deal with them personally.

Lending or borrowing against $THC is better suited to users who desire low-risk economic benefits with confidentiality. Lending is an ideal match for holders who want to keep their tokens while also earning extra money.

You might be concerned: what if the person who borrowed my cryptocurrency refuses to repay it? The point is, borrowing on decentralized Lending Protocols necessitates collateral, which assures that the lenders are paid in full for the principal and interest.
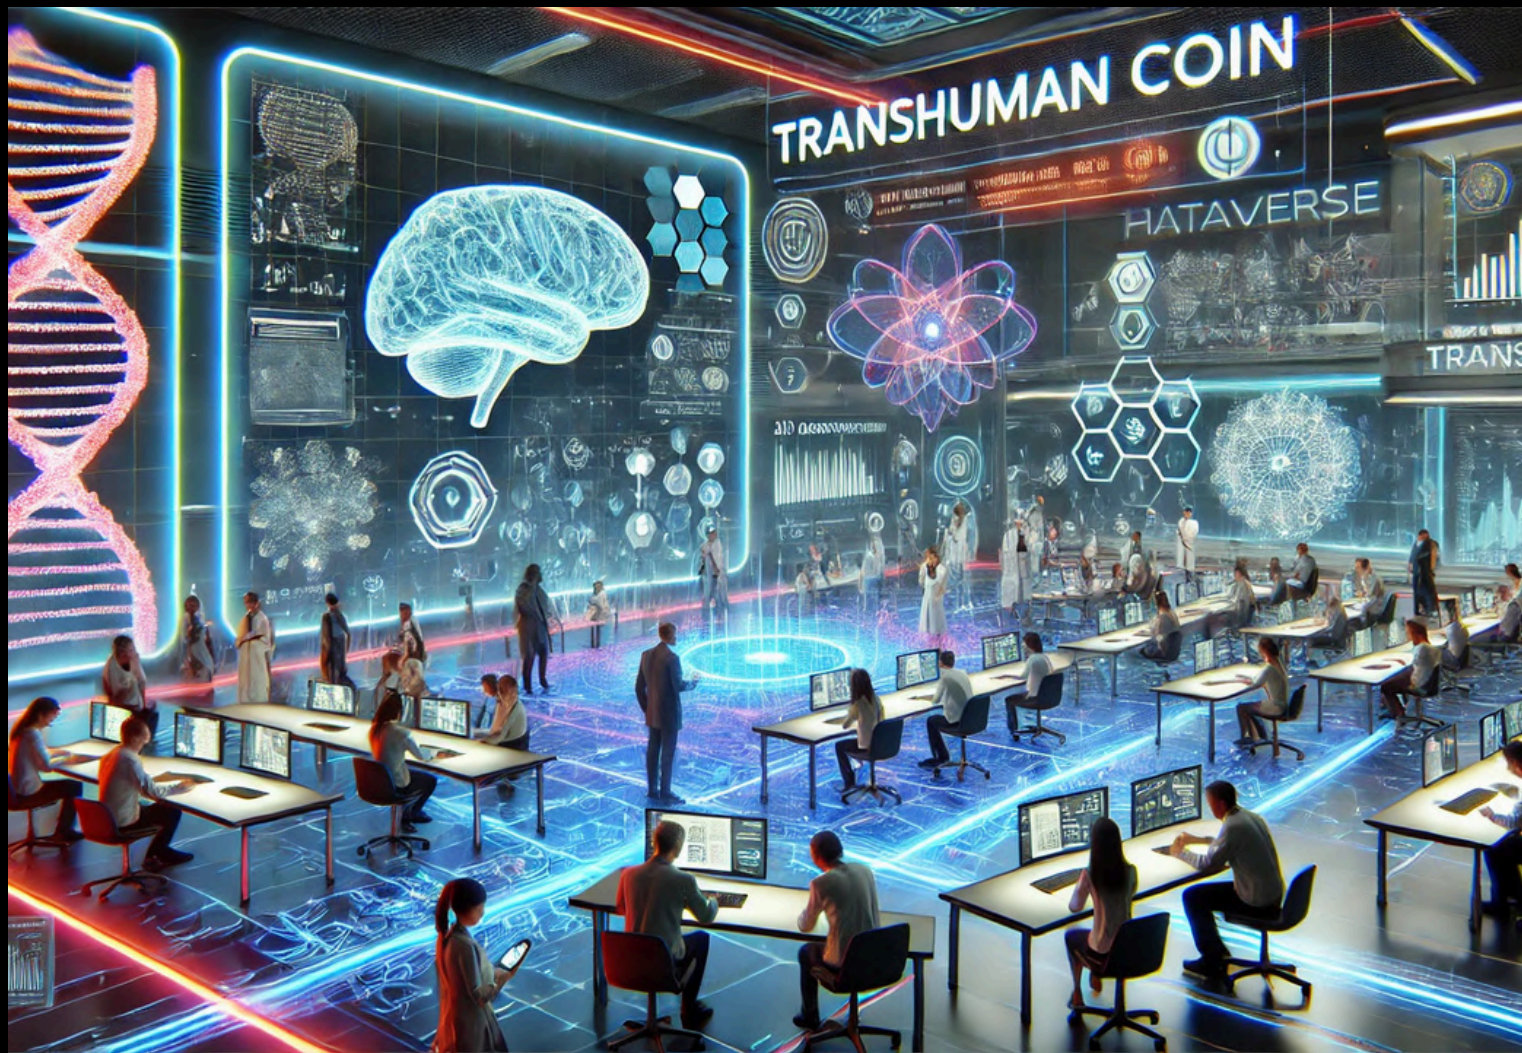

Users of decentralized lending services can apply for any size loan without having to verify their identity with a third party. Transhuman Coin will be used to back loans.

How THC Lending/ Borrowing works?

₿

Deposit crypto assets as collateral

Obtain crypto loans

$

Borrower

THC LENDING

Repays the loan with interest

Receives collateral back after repayment

₿

TRANSHUMAN VIRTUAL RESEARCH CENTER

The Metaverse Research Labs by Transhuman Coin are immersive, decentralized virtual spaces where researchers, students, and innovators collaborate on groundbreaking transhumanist projects. These labs leverage blockchain and virtual reality to enable real-time data sharing, simulations, and experimentation in fields like longevity, AI-driven diagnostics, and brain-computer interfaces. Accessible to a global community, the labs empower participants to co-create solutions to humanity's biggest challenges while promoting transparency and innovation in research. By integrating $THC tokens, the platform incentivizes participation and funds transformative scientific endeavors.

Developer Team:

Peter Xing - Co-Founder, Transhuman Coin:
Peter was Associate Director - Technology, Data & Innovation at KPMG, Co-founder of Transhumanism Australia, Faculty at Singularity University, and Executive of the Science Party Australia. He is currently leading AI Innovation at Microsoft.

Charles Awuzie - Co-founder & CEO, Transhuman Coin

Dr. Charles is a Biochemist, Executive CyberSecurity Consultant and CEO of multiple Tech Startups including Gemsbok Group Pty Ltd in Johannesburg, South Africa. His first degree is in Biochemistry and his MBA Specialization is in Blockchain. Charles was a 2022 member of Forbes Business Council. He is one of Africa's best known advocates of transhumanism.

Alyse Sue has co-founded three ventures including a genomic data machine learning startup, a health startup, and Transhumanism Australia. She is also a startup mentor at CSIRO's ON: Sci-Tech Accelerator Program. Alyse is a member of THC Dev Team. She was former Director of Metaverse at KPMG.

SCIENTIFIC ADVISORY BOARD

As an Innovative Organization, Transhuman Coin requires a Scientific advisory body, consisting of Key Scientific Leaders like Prof. Aubrey De Grey and led by Prof. Avinash Singh, to maintain platforms for exchanging ideas and sharing knowledge.

THC SAB play san important role in mapping strategic directions for our future projects.
The major Relevance of our Scientific Advisory Board includes:

1. Advising the Management Team about the scientific directions the project should take in achieving its Biotechnological projects.

2. Raising the profile of Transhuman Coin in the Scientific Community by bringing on board the best Scientists and Technologists on the leadership of THC

3. Sharing the ideas, based on data and personal experiences.

4. Advise and supervise the innovation processes - from early discovery of solutions to clinical stages, from basic science to the industry; from innovations and prototyping to commercialization. This means that the success of our major goals lies on the shoulders of the Scientific Advisory Board.

SCIENTIFIC ADVISORY BOARD MEMBERS

MEET THE CHAIRPERSON OF OUR SCIENTIFIC ADVISORY BOARD

Dr. Avinash Singh

Dr. Avinash Singh is an Australian Research Council Postdoctoral Research Fellow at the Australian Artificial Intelligence Institute (formerly known as Centre for Artificial Intelligence) in University of Technology Sydney (UTS), Australia, and Founder of India Future Society.

He is also a member of Transhumanism Australia and actively advocate and promote Transhumanism. Dr Singh completed his Ph.D. degree in Computer Science in 2019 from UTS, Australia in collaboration and support with Technical University of Berlin, Germany, University of California San Diego, USA, and US Army Research Lab. Before his doctorate, Dr. Singh received his Bachelor's degree in Mathematics in 2007 from Chhatrapati Shahu Ji Maharaj University, India, and Master's in Software Systems in 2013 from Birla Institute of Technology and Science Pilani, India. During these years of study and work, Dr. Singh worked on various topics in human-centered technologies focusing on brain-computer interfaces (BCIs).

Dr Singh has developed several systems such as 'Web-browser for blinds based on natural language processing,' 'A brain-computer interface (BCI) system for communication,' 'An eating-assistant system for the user with a disability,' 'A closed-loop system to evaluate and adapt user's feeling in Virtual Reality,' etc. He also serves the IEEE Standards committee on Neuroethics and BC, and recently received Google TensorFlow Faculty Award 2021 to support and promote work in BCI.

His current research interests are integrating artificial intelligence (AI) technologies with cognitive neuroscience knowledge to explore the cognitive functions, discover the relationships between brain dynamics, evaluate everyday interaction, and make decisions, and develop robust next- generation of brain-computer interfaces.

Dr. José Luis Cordeiro Mateo

Dr. José Luis Cordeiro Mateo is a Venezuelan-Spanish engineer, economist, futurist, and transhumanist, who has worked on different areas including economic development , international relations, Latin America, the European Union, monetary policy, comparison of constitutions, energy trends, cryonics, and life extension.

Dr. Cordeiro was born in Caracas, Venezuela from Spanish parents who emigrated from Madrid during the Franco dictatorship.

Cordeiro obtained Bachelor of Science (B.Sc.) and Master of Science (M.Sc.) degrees in Mechanical Engineering at the Massachusetts Institute of Technology (MIT), Cambridge, USA. He subsequently studied International Economics and Comparative Politics at Georgetown University in Washington, USA, and obtained a Masters of Business Administration (MBA) at the Institut Européen d'Administration des Affaires (INSEAD) in Fontainebleau, France, majoring in Finance and Globalization. He started his doctoral degree at MIT, continued these studies in Tokyo, Japan, and in due course received his PhD at Universidad Simón Bolívar (USB) in Caracas, Venezuela.

Dr. Cordeiro brings a lot of value to the Scientific Advisory board of Transhuman Coin and the entire Transhumanism community.

SCIENTIFIC ADVISORY BOARD

ZANE MA

Zane holds a Masters Degree in Health Science from Macquarie University. He is the CEO at Taslyhealthpac Fort Healthcare Pty Ltd. Zane leads the Australian organization which provides health solutions to individuals, established medical enterprises, aged care facilities and corporate bodies. Zane brings a wealth of experience to THC's Scientific Advisory Board in medical enterprise infrastructure and the business development of healthcare assets.

JABU NKEHLI

Jabu is a South African Medical Doctor specializing in Dermatology. Her Qualifications include:
1. Bachelor of Medicine and Surgery [M.B.Ch. B], December 2000.

2. Master of Medicine [M.Med. (Derm)], Dec 2020, University of the Witwatersrand, Johannesburg. Jabu's experience is valuable to THC.

3-Fellowship of College of Dermatologists (SA) 2011, College of Medicine (SA).

JONATHAN WOODS

Jonathan Woods is an Australian Based Transhumanist and Top Investor In Transhuman Coin Project.
Jonathan's professional background includes holding top positions at Deloitte, Australia and PWC.
Jonathan is best described as a Technologist and futurist who has played a major role in the Transhumanism Movement.

SCIENTIFIC ADVISORY BOARD

ADETOLA MOWO-WALE

Adetola is an American based medical doctor by training and an ACRP certified Senior Clinical Research Associate by profession.
Adetola has over 10 years of monitoring and site management experience across a wide therapeutic indications including Oncology (Chemo/Immuno therapy in both solid and liquid tumors), Vaccines, Medical device and General Medicine trials. Adetola is a Top Investor in Transhuman Coin.

ART RAMON

Art holds a degree from Washington State University with majors in Computer Science. Art has worked in the IT industry for about 18 years. He has written Stock and Cryptocurrency Trading trading Bots using Python Programming Language.Art is the Visual Arts Director of The United States of America Transhumanist Party. He is one of the first to adopt THC from the USTP.

SCIENTIFIC ADVISORY BOARD

PETER XING – CO-FOUNDER:

Peter is Associate Director - Technology, Data & Innovation at KPMG, Co-founder of Transhumanism Australia, Faculty at Singularity University, and Executive of the Science Party Australia. Peter's Corporate Responsibilities includes:

-Designing strategy and developing solutions for businesses in preparation for the impact of automation from emerging technologies including artificial intelligence, distributed ledger technology and the internet of things- Automating the delivery of actionable business insights to leadership using digital, data and design principles

CHARLES AWUZIE – CO-FOUNDER/CEO

Charles doubles as CEO of Africa's fast growing Technology and Green Energy Giant– Gemsbok Group. He is also Member of Forbes Business Council. He studied Biochemistry in his 1st degree and proceeded to train as an Information Security Expert with special interest in Digital Forensics and Incident Response, Penetration Testing, End Point Protection and Mobile Security.
Charles is Africa's most vocal Transhumanist and is hugely responsible for the spread of the ideology of Transhumanism across Africa. He is currently playing a vital leadership role in the Transhuman Coin Project.

DEMOCRATIC PROCESS IN FUNDING PROJECTS:

TOP INVESTORS will nominate deserving organizations for funding afterwhich we will use a DAO Voting System to decide which of the nominated organizations will receive the investments allowing for unparalleled participation among our holders.

These fundings will be livestreamed via our community platforms and recorded to ensure absolute Transparency.

We will be reaching out to Transhuman Organizations and innovators across the world to register our intent to invest in their projects in exchange for equity, control or IP and we will communicate the steps taken to the community. We shall maintain a proposal platform to receive project proposals too.

WHY FUND TRANSHUMANISM THROUGH CRYPTOCURRENCY?

It used to be the Internet that made headlines in the digital economy. It accelerated the pace of human civilization progress, opened a new era; It has penetrated into all aspects of social production and life, profoundly changing the operation mode of human society.

Today, a new technological and industrial revolution is in its infancy, and innovation has become the primary driving force for development. The blockchain technology has become the most important application achievement, which quickly attracted the attention of financial enterprises.

With an economy of over $3 Trillion, the crypto market has huge potential and can be harnessed for the greater good of humanity. The Transhuman Coin harnesses this massive potentials, allowing both the rich and the poor to participate in the race to solve Aging, Achieve Super- Longevity and Super-Intelligence in Humans.

Why Choose Transhuman Coin

Open for global participants

Transhuman Coin facilitates the transaction and brings them closer to a wider audience. An added benefit of Transhuman Coin use is that it's completely decentralized, so it has global impact. The use of technology will facilitate a financial revolution that will revolutionize the way of charity

Free from corporate and government interference

Transhuman Coin transactions have no intermediary institutions or government involvement, the costs of transacting are kept very low. Additionally, any transfer happens very quickly, eliminating the inconvenience of typical authorization and waiting period requirements.

The efficiency of payment transactions

Standard transfers and foreign purchases typically involve fees and exchange costs. Since Transhuman Coin transactions have no intermediary institutions or government involvement, the costs of transacting are kept very low. Additionally, any transfer happens very quickly, eliminating the inconvenience of typical authorization requirements and wait periods.

Binance Blockchain Compliant

Transhuman Coin is an Binance blockchain compliant Coin means that it supports a few functions of many coins.

Why Choose Transhuman Coin?

Transparency & immutability

With the Transhuman Coin, each time exchange of THC is recorded on the BEP-20 blockchain, an audit trail is present to trace where they came coin from. This can not only help improve security and prevent fraud in exchange-related businesses, but it can also help verify the authenticity of the traded assets

Lower Fees

The fees associated with Transhuman Coin transactions are far less than those associated with debit, credit cards as well as wire transfers, and BACS payments.

Transaction traceability

Transhuman Coin is far more secure than other record-keeping systems because each new transaction is encrypted and linked to the previous transaction. It is formed by a complicated string of mathematical numbers and is impossible to be altered. This immutable and incorruptible nature of the transhuman Coin makes it safe from falsified information and hacks once formed.

Ease to use

Ease of use is the reason why Transhuman Coin has value. All you need is a smart device, an internet connection and instantly you will be part of it.

OUR ROADMAP

At this point, we have made great traction in achieving the goals of Transhuman Coin. We have made donations to organizations working in the Longevity Industry. We have grown our community to over 20,000 members. We have hit over 17 million USD in MarketCap. We have launched THC NFTs and a Medical E-store. But we still have a long journey ahead of us.

Follow Our Journey

Phase 1
- Approve Core Development
- Launch Public Sale
- Listing on Pancakeswap
- Listing on CG and CMC

Phase 2
- Promotion Campaign
- Marketing Campaign
- Hits 20m Market Cap
- Registered as Delaware LLC

Phase 3
- Made 1st Funding
- Buy back and Burn Weekly
- BillBoards in Africa
- Branded Vehicle Ads
- Over 15,000 Holders

Phase 4
- THC Web3 Clinic
- Launch Medical E-store
- Killer Whales TV Show
- Transhumanist Metaverse

Phase 5
- List on Top Tier CEX
- Bridge to Solana
- Researchers Apply for Grants

Phase 6
- Launch of decentralized laboratories in Metaverse
- Scientific Advisory Board reports on THC research projects
- Invest in Research & Development

BREAKING NEWS
WE ARE BUILDING OUR OWN BLOCKCHAIN

Key Parts of THC Ecosystem

- Medical E-Store
- Research & Development
- Metaverse
